DETAILED ACTION

The following is a quotation of the **second paragraph** of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claims **1**, **10**, and **19** are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The limitation of Claims 1, 10, and 19 "... <u>pre-existing</u> traditional printed material ..." is not clear.

What does "... pre-existing ... " mean?

What are the differences between <u>pre-existing</u> traditional printed material in <u>electronic books</u> disclosed in the application [0018] and the reference's <u>electronic</u> <u>books?</u>

To further advance prosecution, the Examiner interprets "... <u>pre-existing</u> traditional printed material ..." as a book, magazine, or article with printed material at the point of purchase.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Art Unit: 2629

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5, 8-14, and 17-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Ohara et al. (US Patent No. 5739814).

Regarding Claims **1** and **10**, (currently amended) **Ohara et al.** teach a computer-implemented method of correlating and a <u>non-transitory</u> computer readable storage medium having a plurality of machine accessible instructions stored thereon, wherein when the instructions are executed by a processor, the instructions cause the processor to correlate respectively, pre-existing traditional printed material to a response produced by a computer system comprising:

defining an object on a page (i.e. **indicia**, Col. **4**, Ln. **63-66**, FIG. **2**) of the traditional printed material (i.e. pages or sheets in the **book**, Col. **7**, Ln. **5**; or **printed data**; Col. **7**, Ln. **17-19**); and

link a position (Col. 7, Ln. 26-34, FIGs. 5 & 6; Col. 7, Ln. 44-47) of the object on the page, and a related response (Col. 7, Ln. 47-51, FIG. 2) to be performed by the computer system, wherein the position of the object on the page corresponds to a physical position in the page of the pre-existing printed material (Col. 3, Ln. 20-32) which is identified by the computer system when the pre-existing printer material has been placed in a printed material holder (i.e. cover, Col. 4, Ln. 56-58, Col. 7, Ln. 27-34, FIGs. 5 & 6; Col. 7, Ln. 44-47, FIG. 9) by a user (Col. 5, Ln. 5-8, FIG. 9), the printed material holder being coupled to the computer system (Col. 4, Ln. 58-62, FIG. 2), and wherein the position on the page is defined by a relative position of the traditional

Application/Control Number: 10/579,048

Art Unit: 2629

printed material to a known physical location of the printed material holder (Col. 7, Ln. 27-34, FIGs. 5 & 6; Col. 7, Ln. 44-47, FIG. 9).

Page 4

Regarding Claims 2 and 11, (original/currently amended) Ohara et al. teach the computer-implemented method of claim 1 and the <u>non-transitory</u> medium of claim 10 respectively, wherein the response comprises at least one of rendering audio content, rendering video content, rendering image content, rendering text content, and performing.

Regarding Claims **3** and **12**, (original/currently amended) the computer-implemented method of claim 2 and the non-transitory medium of claim 11 respectively, further comprising (instructions for (Claim 11)):

generating a multimedia database (Col. **7**, Ln. **39-41**, FIG. **9**) to store digital multimedia content including at least one of audio content, video content, image content (Col. **7**, Ln. **34-37**, FIG. **9**), and text content (i.e. pages or sheets in the book, Col. **7**, Ln. **5**; or printed data; Col. **7**, Ln. **17-19**);

a printed material content database to store positional information about objects on the pages and linkage information between the objects (Col. 7, Ln. 27-34, FIGs. 5 & 6; Col. 7, Ln. 44-47, FIG. 9) and at least one of the multimedia contents and actions (Col. 7, Ln. 34-55, FIG. 9);

and an action library (i.e. ROM 16, Col. 7, Ln. 39-41, FIG. 9) to store directives (i.e. signals and data, Col. 7, Ln. 39-41, Ln. 45-51, FIG. 9) for actions to be performed on the computer system.

Application/Control Number: 10/579,048

Art Unit: 2629

Regarding Claims **4** and **13**, (original/currently amended) **Ohara et al.** teach the computer-implemented method of claim 2 and the non-transitory medium of claim 11 respectively, wherein (instructions for (Claim 13)) defining the object on the page comprises (instructions for (Claim 13)) using an electronic pen to outline boundaries of the object on the page (Col. **7**, Ln. **52-54**, FIG. **9**).

Page 5

Regarding Claims **5** and **14**, (original/currently amended) **Ohara et al.** teach the computer-implemented method of claim 2 and the non-transitory medium of claim 11 respectively, wherein (instructions for (Claim 14)) defining the object on the page comprises (instructions for (Claim 14)) using an electronic pen to select key points on the boundary of the object on the page (i.e. inherent; Col. **7**, Ln. **20-34**, FIGs. **5 & 6**).

Regarding Claims 8 and 17, (original/currently amended) Ohara et al. teach the computer-implemented method of claim 2 and the non-transitory medium of claim 11 respectively, wherein the printed material comprises a traditional paper book (i.e. pages or sheets in the book, Col. 7, Ln. 5; or printed data; Col. 7, Ln. 17-19).

Regarding Claims **9** and **18**, (original/currently amended) **Ohara et al.** teach the computer-implemented method of claim 2 the non-transitory medium of claim 11 respectively, wherein the printed material comprises material generated by a user (i.e. drawing, Col. **5**, Ln. **27-31**).

Regarding Claim **19**, (currently amended) **Ohara et al.** teach an apparatus for associating a selected object on any pre-existing printed material to a valid response provided by a computer system comprising:

Art Unit: 2629

a pointing device (i.e. pen 24; Col. 7, Ln. 54, FIG. 9) to determine a position (Col. 7, Ln. 29-34, FIG. 9) on the pre-existing printed material (i.e. pages or sheets in the book, Col. 7, Ln. 5; or printed data; Col. 7, Ln. 17-19), wherein the pre-existing printed material is to be placed on a printed material holder (i.e. cover, Col. 4, Ln. 56-58, Col. 7, Ln. 27-34, FIGs. 5 & 6; Col. 7, Ln. 44-47, FIG. 9) by a user (Col. 5, Ln. 5-8, FIG. 9), and wherein the position on the pre-existing printed material is defined by a relative position of the printed material (Col. 3, Ln. 20-32) to a known physical location of the printed material holder (Col. 7, Ln. 27-34, FIGs. 5 & 6; Col. 7, Ln. 44-47, FIG. 9);

a communicating device coupled to the printed material holder to transmit the position to the computer system (Col. 7, Ln. 41-43, FIG. 9);

a maker (i.e. areas, Col. 7, Ln. 54-59, FIG. 9) component to define an object on a page (i.e. indicia, Col. 4, Ln. 63-66, FIG. 2) of the pre-existing printed material (Col. 7, Ln. 54-59, FIG. 9); and

to link a position (Col. 7, Ln. 26-34, FIGs. 5 & 6; Col. 7, Ln. 44-47) of the object on the page and a related response (Col. 7, Ln. 47-51, FIG. 2) to be performed by the computer system; and

a player component (i.e. ROM 16, Col. 7, Ln. 39-41, FIG. 9) to correlate the pointed position to selected content associated with the pre-existing printed material, the selected content being accessible by the computer system (Col. 7, Ln. 52-61, FIG. 9); and

to provide a valid response (Col. 7, Ln. 47-51, FIG. 2) to the user based at least in part on the pointed position and the correlated content, wherein the valid response

Application/Control Number: 10/579,048

Art Unit: 2629

includes at least one of rendering audio content, rendering video content, rendering image content, rendering text content, and performing an action by the computer system (Col. 7, Ln. 35-38, Ln. 45-51, FIG. 9).

Page 7

Regarding Claim **20**, (currently amended) **Ohara et al.** teach the apparatus of claim 19, wherein the pointing device comprises an electronic pen (Col. **7**, Ln. **54-59**, FIG. **9**).

Regarding Claim 21, (currently amended) Ohara et al. teach the apparatus of claim 19, further comprising a multimedia database to store digital multimedia content (Col. 7, Ln. 45-49, FIG. 9), a printed material content database to store positional information about objects on the pages (Col. 7, Ln. 54-59, FIG. 9) and linkage information between the objects and at least one of the multimedia contents and actions, and an action library to store directives for actions to be performed on the system (Col. 7, Ln. 45-49, FIG. 9).

Regarding Claim 22, (currently amended) Ohara et al. teach the apparatus of claim 19, wherein the pre-existing printed material comprises a traditional paper book (i.e. pages or sheets in the book, Col. 7, Ln. 5; or printed data; Col. 7, Ln. 17-19).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) a patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 2629

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

3. Claims 6-7 and 15-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over **Ohara et al. (US Patent No. 5739814).**

Regarding Claims 6 and 15, (original/currently amended) Ohara et al. teach the computer-implemented method of claim 2 and the <u>non-transitory</u> medium of claim 11 respectively.

Although **Ohara et al.** do not teach that (instructions for (Claim 15)) defining the object on the page comprises (instructions for (Claim 15)) using a mouse to manipulate a graphical object on a display to encapsulate the boundary of the object on the page as displayed on the display.

However, it would have been obvious to a person having ordinary skill in the art at the time the invention was made to replace **Ohara et al.'s** touch pen with a mouse to manipulate a graphical object on a display to encapsulate the boundary of the object on the page as displayed on the display *for the benefit of* utilizing an alternative input device.

Regarding Claims **7** and **16**, (original/currently amended) **Ohara et al.** teach the computer-implemented method of claim 2 and the non-transitory medium of claim 11 respectively.

Although **Ohara et al.** do not teach (instructions for (Claim 16)) defining the object on the page comprises (instructions for (Claim 16)) using a mouse to select key points on the boundary of the object on the page as displayed on a display.

Art Unit: 2629

However, it would have been obvious to a person having ordinary skill in the art at the time the invention was made to replace **Ohara et al.'s** touch pen with a mouse to select key points on the boundary of the object on the page as displayed on a display for the benefit of utilizing an alternative input device.

Response to Arguments/Amendments/Remarks

- 4. Applicant's arguments, see Page(s) 7-8 filed 10/12/2009, with respect to 35 U.S.C. §101, and §112 2^{ND} ¶, have been fully considered and are persuasive. The Rejections under U.S.C. §101, and §112 2^{ND} ¶ have been withdrawn.
- 5. Applicant's arguments, see Page(s) 7-8 filed 10/12/2009, with respect to the Advisory Action have been fully considered and are **NOT** persuasive.

First of all, applicant argues that "...the printed material is not part of the apparatus, but is to be used with the apparatus...". However, the Examiner respectfully disagrees because there is **no such limitation in the claim**. It is <u>irrelevant</u> that "... an ordinary person, whether skilled in the art or not, will understand from the reading of Applicants' Specification...", it is **claims' limitations** recite the novel and patentable products and/or methods over the prior arts.

Finally, USPTO personnel are to give claims their broadest reasonable interpretation in light of the supporting disclosure. *In re Morris*, 127 F.3d 1048, 1054-55, 44 USPQ2d 1023, 1027-28 (Fed. Cir. 1997). Limitations appearing in the specification but not recited in the claim should not be read into the claim. *E-Pass Techs., Inc. v.* 3Com Corp., 343 F.3d 1364, 1369, 67 USPQ2d 1947, 1950 (Fed. Cir. 2003) (claims

Art Unit: 2629

must be interpreted "in view of the specification" without importing limitations from the specification into the claims unnecessarily). *In re Prater*, 415 F.2d 1393, 1404-05, 162 USPQ 541, 550-551 (CCPA 1969). See also *In re Zletz*, 893 F.2d 319, 321-22, 13 USPQ2d 1320, 1322 (Fed. Cir. 1989).

Conclusion

The prior art(s) made of record and not relied upon (is)/are considered pertinent to applicant's disclosure: Zetts; John M. (US Patent/PGPub. No. 5404458).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to VINH T. LAM whose telephone number is (571)270-3704. The examiner can normally be reached on M-F (7:00-4:30) EST.

Art Unit: 2629

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Amare Mengistu can be reached on (571) 272-7674. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
